PROFESSIONAL SUMMARY

Senior Front-End and Full-Stack Engineer with 12+ years of experience building scalable web applications, enterprise platforms, design systems, micro frontends, workflow solutions, and legacy modernization initiatives. Deep expertise in React, Next.js, TypeScript, and Angular 1-22, combined with hands-on back-end experience in Node.js, C#/.NET, REST and SOAP APIs, PostgreSQL, and SQL Server. Technical leader experienced in guiding cross-functional squads, defining architecture, reviewing code, and delivering cloud-based solutions using Azure, AWS, and Google Cloud Platform. Advanced English proficiency for technical discussions, documentation, interviews, and collaboration with international teams.

CORE TECHNICAL SKILLS

Front-End: React, Next.js, AngularJS/Angular 1-22, TypeScript, JavaScript ES6+, HTML5, CSS3, Sass, Tailwind CSS, Bootstrap, shadcn/ui, Redux, Redux-Saga, responsive design, accessibility, SEO

Architecture: Micro Frontends, Design Systems, component libraries, BFF patterns, reusable front-end foundations, software architecture, legacy modernization, technical discovery

Back-End & Data: Node.js, C#/.NET, .NET Framework, REST APIs, SOAP APIs, Python for automation/RPA, PHP fundamentals, PostgreSQL, SQL Server

Cloud & DevOps: Microsoft Azure, Azure DevOps, AWS, Google Cloud Platform (GCP), CI/CD pipelines, Docker, Git, GitHub, Azure AD/SSO, Application Insights

Quality, Automation & AI: Cypress, Playwright, Jest, unit/E2E testing, code review, Power Automate, RPA, GitHub Copilot, ChatGPT/Codex, Claude Code, Gemini

PROFESSIONAL EXPERIENCE

Tech Lead / Front-End Specialist | Alper Seguros | Sao Paulo, Brazil / Remote | Dec 2023 - Apr 2026

- Led a cross-functional delivery team of two software developers, one QA engineer, and one UX/UI designer while providing technical direction and architectural support across more than four squads.
- Designed ZenFrame, a reusable front-end foundation based on Next.js, React, TypeScript, Tailwind CSS, and modern component patterns to standardize new applications and accelerate delivery across teams.
- Led the modernization of enterprise Angular applications from versions 7 and 8 to Angular 17, improving maintainability, dependency management, security posture, and long-term supportability.
- Delivered BPM and workflow solutions for insurance benefits operations, connecting quoting, sales, implementation, customer relationship, policy movement, and finance through Lecom BPM and Alper Flow.
- Designed and supported Node.js BFF services, C#/.NET components, PostgreSQL and SQL Server data interactions, and REST/SOAP integrations with Quiver Pro, Protheus, and internal enterprise systems.
- Integrated and supported applications using Azure and Google Cloud Platform services, including cloud storage, enterprise integrations, monitoring, Azure DevOps, and CI/CD workflows.
- Defined automation initiatives using Power Automate, Python, RPA, and AI-assisted engineering for code generation, documentation, automated testing, technical discovery, and rapid MVP development.

Senior Front-End Developer | HostGator Latin America | Brazil / Remote | Oct 2022 - Nov 2023

- Developed customer-facing portal experiences for domain management, DNS configuration, customer retention, account services, and support workflows using React, Next.js, TypeScript, Redux, and Redux-Saga.
- Designed and delivered an intelligent diagnostic micro frontend embedded in customer support chat, reducing support ticket creation by 40% and surpassing the original 30% reduction target.
- Improved customer self-service through guided troubleshooting, issue pre-analysis, and clearer escalation paths before customers contacted support teams.
- Expanded TypeScript adoption, strengthened reusable front-end architecture, and worked with strict CI quality gates and minimum unit-test coverage requirements.
- Contributed to the migration of an acquired e-commerce platform from a legacy PHP architecture to Next.js and collaborated with infrastructure teams supporting applications in AWS-based environments.
- Received the Gator Destaque - Employee of the Month award through a company-wide peer vote, recognizing professional impact, collaboration, and delivery performance.

Systems Analyst / Full-Stack Web Developer | MPS Informatica | Client: Sao Paulo State Court of Justice (TJSP) | Sao Paulo, Brazil | Aug 2018 - Oct 2022

- Developed internal and public-facing applications supporting human resources, administrative workflows, content management, and institutional communication.
- Served as a front-end technical reference, defining reusable UI standards and a Bootstrap-based design system to improve consistency across applications.
- Delivered responsive and accessible interfaces and worked across full-stack environments using JavaScript, HTML5, CSS3, Sass, Bootstrap, AJAX, C#.NET Framework, WebForms, MVC, Razor Pages, and SQL integrations.
- Designed navigation flows, wireframes, functional prototypes, layouts, and CMS interfaces in collaboration with business stakeholders.
- Developed a Next.js modernization MVP that helped the team evaluate a current front-end architecture for future applications.

Web Developer | CompuLaser Grafica e Editora | Sao Paulo, Brazil | Jul 2014 - Jul 2018

- Developed institutional websites, product pages, CMS features, internal systems, and customer-facing applications using HTML, CSS, JavaScript, jQuery, and .NET Framework/WebForms.
- Created responsive interfaces, visual layouts, mockups, navigation flows, wireframes, and functional prototypes based on business requirements.
- Improved semantic HTML, technical SEO, page performance, responsive behavior, browser compatibility, and maintainability through reusable front-end patterns.

EDUCATION

MBA in Full Cycle Architecture | Full Cycle | Feb 2024 - Sep 2025 | Software architecture, cloud, DevOps, SRE, AI, distributed systems, and technical leadership

Technologist Degree in Web Systems | Universidade Nove de Julho | Aug 2017 - Jan 2020

LANGUAGES

Portuguese: Native | English: Advanced professional working proficiency
